

# CORTEX v6.0

## Automation Intelligence

### Cortex MTai Framework

provides “Automation Intelligence” to the Cortex family of products.

Featuring a new stand-alone MTai Prompt Interface.

### Create with Cortex

opens a list of MTai prompts to choose from.

**/ CREATE WITH CORTEX**

Click on the / icon and sample prompts are displayed. Some may have sub categories to further refine the task or request.

/CREATE A PROJECT  
/CREATE A DELIVERABLE  
/CREATE A WORKFLOW  
/CREATE A REPORT  
/CREATE AN IMF  
/CREATE A DCP  
/QC A CLIP  
/QC VALIDATE A PROJECT  
/COPY FILES  
/SYNC SOUND  
/EDIT PROJECT  
/EDIT PROJECT  
/COLOR PROJECT  
/FIND  
/HELP  
/EXPORT PROJECT LOGS

Cortex applications run on Windows 10 and Windows 11. Hardware not included.

# CORTEX v5.6

Automate and Consolidate your Workflow with **MTai**

## What's New

The Cortex v5.6 release features a host of advanced functionalities designed for the modern post-production environment:

### Watch Folders for Streamlined Automation

Trigger Quality Control (QC) analysis and renders effortlessly using watch folders, reducing manual intervention and accelerating the post-production process.

### New Gamut Analysis Reports

Enhanced tools for analyzing color gamut ensure precise color management and consistency across the production pipeline.

### Detailed QC Reporting with Thumbnails

Thumbnails are now included in detailed QC reports, providing visual references for easier identification and troubleshooting of issues.

### Seamless Import and Export of QC Comments and Markers

Integration with the Cortex Quality Assurance (QA) module allows for seamless import and export of QC comments and markers, facilitating collaboration and enhancing reporting capabilities.

### Improved Dolby Vision XML File Export

The exported Dolby Vision XML file now includes target displays from all events, ensuring optimal compatibility and accuracy in Dolby Vision workflows.

### Full Compatibility with Latest Dolby Atmos Specifications

Cortex v5.6 offers full compatibility with the latest Dolby Atmos specifications, enabling seamless integration of immersive audio technologies.

### Automated IMF Validation

IMF packages are automatically imported and validated after creation, simplifying the delivery of compliant content for distribution.

### Expanded DCP Agency Ratings and Render Mode Selection

Enhanced support for Digital Cinema Package (DCP) agency ratings and render mode selection provides greater flexibility and control over output formats.

**In a forward-looking move, MTI FILM will introduce the MTai framework** at NAB 2024. This foundational technology promises to unify and automate workflows from on-set to final packaging, leveraging Cortex's robust capabilities.

**A sneak peek into Cortex v6.0 will reveal MTai Automation Intelligence**, featuring a new MTai Prompt Interface and enhanced Watch Folder Automation, marking a significant leap in post-production management and automation.

Learn what Cortex can do to improve your post-production workflow.
